

# Praxis Mundi

*A collaborative psycho-magical act of healing and metaphoric redistribution of power along the 0° Meridian*

Exploring the liminal spaces where Earth meets Sky, East meets West, the mundane meets the sacred and where the land crumbles into the sea, *Praxis Mundi* is the emerging story of a box of Selenite crystals collected at Longitude 0.04 on the South coast of England and sent southwards along the Greenwich Meridian (0 degree longitude).

*Praxis Mundi* is a conceptual and collaborative work that hopes to become a collection of on-line texts, imagery and sound, as the journey of the box is traced, and the energy of the selenite is concentrated and dissipated along the meridian, its synapses and networks, in a flow, in a dance of its own, as it is received by different people in different countries.

This project hopes to creatively enrich what we know about the 0° meridian line with stories collected as the box travels along its path, which we hope will reach the crossing with the Equator, in the vicinity of Ghana, as an offering and historical reparation.

Dear collaborator,

Thank you for receiving this box of selenite crystals. These pieces were collected from the beach underneath the 85 million year old cliffs along the South coast of England approximately 3 miles East of the  $0.00^\circ$  longitudinal line known as the Greenwich Meridian.

Extending between the poles of the earth, this Meridian passes through The Arctic Ocean, Greenland Sea, Norwegian Sea and North Sea before hitting land in the United Kingdom. From there, it crosses the English Channel to reach France and Spain and then the Mediterranean Sea to meet the African continent where it passes through Algeria, Mali, Burkina Faso, Togo and the Gold coast of Ghana. From there, it crosses the Atlantic Ocean and Southern Ocean to reach Antarctica.

For nearly two centuries, the Meridian has served as the basis for navigation, the world time zone system, and as the dividing line between Eastern and Western hemispheres.

Some research points to the Greenwich line as an ancient pathway of astronomical and telluric significance. Some say that British Kings and Queens and their freemason advisors both knew and made use of the

power connected to this line to empower and assure their dominion. Accounts of medieval magic connect this line with mysteries of an ancient axis, a portal into the Axis Mundi, the connection between Heaven and Earth.

Similarly, Selenite is said to connect earthly and stellar energies as it anchors the light body in the earth vibrations. These selenite crystals were shipped from a post office at 0.00° longitude in the United Kingdom as part of a cross cultural arts exhibition, Espiral del Sur / [Linea SuR NoRtE](#). They were addressed to the curator of the exhibition who lives along the Prime Meridian in Valencia, Spain. The crystals were sent with the hope that they will continue to travel southwards, meandering along the Meridian until they reach Ghana, just north of the Equator.

You are a friendly host, a stopping point on their journey. It is our hope that you will join our efforts in carrying out a collaborative psycho-magical act of healing and metaphorical redistribution of power along this North- South axis. We are curious to know what stories the 0° meridian line might have to share in your locale and what insights the crystals might have to share with you.

We have created an interactive [online mapping tool](#) to facilitate your creative collaboration.

When you receive the box, we invite you to spend some contemplative time with these crystals. Perhaps you might take them to a point at 0.0°, or a sacred, powerful or meaningful place nearby. You could, for example, use them in a ritual, in an artistic installation, leave them in the light of the full moon, meditate with them or place them by your bed and see what you dream.

## *There are three things we would ask every host to do;*

- 1) Allow the crystals to have direct contact with the earth wherever you are.
- 2) Add your name and location to the scroll in the box and,
- 3) Share your experiences via the map with a pin on your location and any photos, videos, writings, webpages or sound bites that you might like to share about the meridian or your time with the crystals.

## *Caring for the crystals*

The selenite crystals will dissolve if left in water so best to keep them dry. There are sage sticks in the box that are there to protect the crystals as they travel. If you burn one of the sage sticks please be sure to replace it with another natural material.

Once you are ready, please pass the crystals on to a willing recipient down the line. Please be sure to send them by surface mail and feel free to add anything you wish to the box.

\*If you do not know anyone further south then please feel free to contact

us via the webpage <https://www.earth-speaks.net/praxis-mundi> and we will help you to find someone.

\*\* If you live on the Gold Coast of Ghana and are the final host, we ask that you send the scroll back to the first address written at the top. Please do not return the crystals they are yours to do with what feels right. Please do let us know what and where that turns out to be.

We thank you and wish you well with your crystal collaborations and beyond.

Jane & Karmit / *Praxis Mundi* 27 de Febrero 2021
